

## **GMP Facilities Engineer**

### **Company Overview**

NextCure is a growing clinical-stage biopharmaceutical company located in Beltsville focused on discovering and developing first-in-class immunomedicines for the treatment of cancer and other diseases. NextCure is committed to professional development in the context of learning, managing, and developing its employees. We create a unique environment for our employees, providing exposure to various facets of our operations cultivating career growth and development. We are excited about the ongoing work at NextCure and invite you to come join us in the culture and build your career in an environment that nurtures professional growth and development.

### **Role Summary**

We are seeking a highly motivated GMP Facility Engineer. The candidate will utilize advanced skills to perform complex preventive maintenance and corrective repair of buildings, industrial systems, equipment, and grounds. Working under limited supervision, in a fast-paced environment, he/she will monitor building system operations and performance. He/she will utilize several trade skills such as carpentry, plumbing, electrical, painting, roofing, heating and cooling as well as all core engineering principles.

### **Responsibilities**

- Comply with all applicable codes, regulations, governmental agency and Company directives related to building operations and work safety
- Inspect building systems including fire alarms, HVAC, and plumbing to ensure operation of equipment is within design capabilities and achieve environmental conditions prescribed by client
- Oversee and inspects the work performed by outside contractors. Contracted work includes landscaping, snow removal, remodeling, HVAC, plumbers, electrical, and cleaning
- Perform assigned repairs, emergency, and preventive maintenance
- Complete maintenance and repair records as required
- Review assigned work orders, estimate time and materials needed to complete repair
- Order necessary materials and supplies to complete all tasks
- Maintain an energy management program to ensure measures are taken to operate all systems in the most efficient manner to keep operating costs at a minimum
- Maintain the building lighting system, including element and ballast repairs or replacements
- Perform welding, carpentry, furniture assembly and locksmith tasks as needed
- Respond quickly to emergency situations, summoning additional assistance as needed
- Will be on call every other week
- Provide informal assistance such as technical guidance and/or training to coworkers

## Required education and experience

- BS degree in Engineering or 4 years of on-the-job experience as a Building/Facility Engineer
- Experience in GMP, Engineering, Designing/Drawing required
- Experience in CAD required
- Hands on working with tools required
- Universal CFC certification highly preferred
- Additional certification in one or more of the following preferred: electrical, mechanical, HVAC and refrigeration systems, process controls, mechanical power transmissions, painting, plumbing, carpentry, or engine repair
- Certifications/licenses required by local or state jurisdictions

## Qualifications

- Basic knowledge of financial terms and principles required with ability to maintain detailed budget
- Ability to write complex engineering and GMP compliance documented reports and correspondence
- Comfortable in solving complex engineering and equipment problems and deal with a variety of complex variables in situations where only limited standardization exists.
- Physical requirements include stooping, standing, walking, climbing stairs / ladders and ability to lift / carry heavy loads of 50 lbs. or more.
- Ability to make sound judgements and decision, errors in judgment may cause short-term impact to co-workers or serious injury death.
- Responsible for personal safety and the safety of those who are affected by your work. This includes but is not limited to:
  - Complete all required and assigned GMP training at a satisfactory level
  - Follow all GMP activity policies and procedures, at all times
  - Participate in all GMP related programs & activities as required, including incident investigations, interviews, auditing, and assessment, etc.
  - Report any conditions which you feel could result in an accident or injury and / or stop work if required
- Demonstrate expert analytical skills
- Strong verbal and written communication skills

NextCure is an Equal Opportunity Employer and offers a competitive salary, cross functional exposure and potential career growth in a scientifically engaged team work environment.
